

IV EPS Group

Providing Full-service Support for Drug Development Outsourcing

As the core of the EPS Group's CRO business, we provide a wide range of services supporting pharmaceutical companies' drug development process, including SMO operations, personnel dispatch, and non-clinical trial operations (including various services outsourced from pharmaceutical companies in the stages prior to clinical trials). As part of our full-service support business, our Group also provides services ranging from planning to new medical applications. Additionally, as our medium-term management objectives, we aim to expand overseas, build new businesses, and raise the quality and efficiency of our operations while at the same time growing our existing businesses.
