

Offshore Data Management Services

We Guarantee the Same Speed and High Quality of Data Management Services as in Japan

Post-marketing surveillance is getting larger and more complicated particularly in Japan. There is a shortage of human resources who can manage these operations. To address this situation, we provide experienced staff with high-level technical capabilities through EPS International (China) office, and guarantee the same speed and high quality of data management services as in Japan.

Flowchart of Offshore Services

We guarantee on-time completion with high quality of data management services as client correspondence and quality control are operated in Japan and the core part of data management is operated in EPS International (China) office.

Stringent Quality Control

- EPS International (China) operates in accordance with EPS Japan's procedures which are highly regarded by our clients.
- Data management manager checks the work result from China so that we can provide same quality as we do in Japan.
- Data management manager from EPS will work in China to train the core team.
- EPS International (China) uses approved EPS training system to learn Japan's legal system and original operational flow.

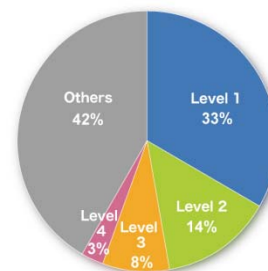

The Leading CRO in China 『EPS International (China) Co., Ltd.』
